

SENSORS & INDICATORS

Tapecon helps improve your products by manufacturing various types of printed indicators and sensors that improve the functionality of your product. Tapecon uses inks that are formulated to change colors to indicate or sense specific chemical or environmental changes including temperature, sterilization, proximity and more. These inks are used in applications that require a confirmation or notification that the change has occurred.

Applications

- Instrument Pouches
- Sterilization Indicating Labels
- Peel Pouches & Reels
- Medical Devices & Instrument Monitoring
- Pharmaceutical Devices & Instrument Monitoring
- Food Processing & Food Safety
- Environmental Monitoring
- Biomarker Detection
- Toxicity Exposure
- Proximity Sensors
- Indicating Labels
- Indicating Tapes
- Indicating Test Strips
